

Stalingrad: Verdun on the Volga

Addenda as of Jan 1, 2019

Rules:

15.2.1 Exception: Soviet units (only) may trace supply from Area 62 through Area 61 and back to Zone L. This is an exception to this rule where normally unbridged ravines prevent the tracing of supply across them.

Examples:

Pg.10 Volga Crossing (correction): The Soviets should get a +1 for a night impulse added to their AV as well, as per Rule 11.4.2F. Adjust the example as follows: +1 for Night, reduce the Storm Group die roll from "4" to "3"; the rest of the example remains unchanged.

Pg.14 Combat (typo): Third Paragraph: Change Area 27 to Area 23 as that is the area being overrun.

Counters:

Extra Markers (clarification): There is both an extra turn marker and two extra German air support markers included with the counter mix; as these counters get handled a lot, these would be the first to show wear, so we gave you some extras.
